## VAGINAL TIGHTENING & REJUVENATION

No one wants to age or lose optimal function anywhere, and this includes the vagina. Most of the women come to us because they want knowledge, choice, and alternatives. Women want their gynaecologist to listen to them and provide viable solutions.

The female body undergoes various changes as a woman ages. However, thanks to medical breakthroughs, it is possible to reduce the effects of the natural aging process. A woman can undergo vaginal rejuvenation which involves tightening the walls and the opening of the vagina. More often than not, as the woman ages or after several deliveries, the vagina loses its tone and firmness. The process will also enhance the tissue around the vagina and lasts for a long time.

### Benefits of Vaginal Rejuvenation

One benefit of this procedure is comfort. When the vagina is loose, a lot of friction occurs and this can be the cause of untold suffering for the woman. The surgeon will tailor the laser vaginal rejuvenation to the woman's needs because just as the rest of the body differs from one person to the other, so does the reproductive organ of every woman.

Secondly, this improvement renews the woman's confidence. She will not feel different from others or even lack confidence in her sexuality. The self-esteem changes for the better because the woman will feel desirable and attractive.

Thirdly, renewed firmness of the vagina opening enhances pleasure during intimacy. The partner will also feel this change and this is bound to boost the couple's satisfaction and involvement.

Please feel free and comfortable to discuss about the same with doctor.
