MOLE / WART REMOVAL

What is LASER MOLE / WART REMOVAL ?

Sometimes it happens that your beauty spot spoils your beauty. Many of us, wish to remove that unwanted mole or wart to get new look and personality. Laser Mole/Wart Removal can do that for you.

What is Laser Mole/Wart Removal ?

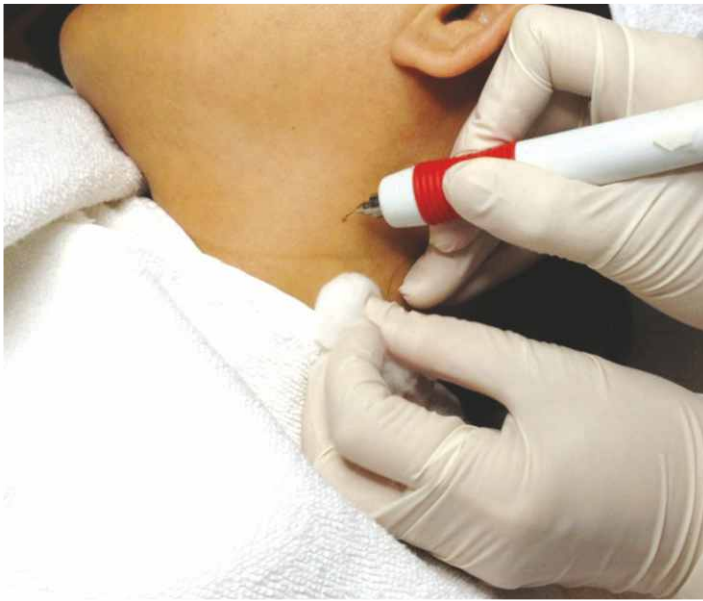

It is a process of removing mole or wart using laser light energy on the targeted area. Affected area absorbs the laser light and then pigment in the area is broken up. This is broken pigment is then absorbed during the healing process.

How many sessions will be required ?

It depends upon the size and type of the mole/wart. But mostly 3-4 sessions are required for the complete results.

Will there be any side effects ?

There are no long term side effects. Most commonly you will get redness and swelling in the treated area which will go away in one or two weeks.
