HAIR REMOVAL

What is LASER HAIR REMOVAL ?

Laser Hair removal is a process to remove unwanted hair through laser light. It is an ideal and effective process for those who are not comfortable with fussy and frequent ways of hair removal like shaving, waxing or tweezing. It is one of the most commonly done beauty treatments these days which gives you smooth skin for many months. With Laser Hair Removal you can get rid of unwanted hair on face, neck, back, chest, shoulders, hands & legs.

How it is done ?

A concentrated beam of light is aimed at the required hairy area. The laser light gets absorbed by the pigment of that particular area and destroys the hair follicle resulting in future growth retardation.

Is it safe ?

With new and advanced technologies, Laser Hair Removal is absolutely safe procedure.

How many sessions will one need ?

Generally one needs at least six sessions but sessions and results may vary according to person's skin type and hair growth pattern.
